NON DESTRUCTIVE TESTING (NDT)

Third party contractors will complete all testing. Employees will respect the boundaries setup by the testing companies. The sub contractors will submit site specific safety plans for their sampling methods. This plan will be reviewed by the Project Manager and Superintendent. A safety meeting will be held to familiarize the employees on site with the contents of the plan after the testing company's site plan has been approved.

Radiation – in the event of radiological testing, no employee is allowed to cross the yellow and magenta barrier tape that will surround the testing area. Crossing the barrier that will protect the hazardous area will result in severe disciplinary action.
